

COMPANY BROCHURE

From drawing to precision tooling.

Investment casting dies. Custom dies & moulds.
VMC machining for the detail that matters.

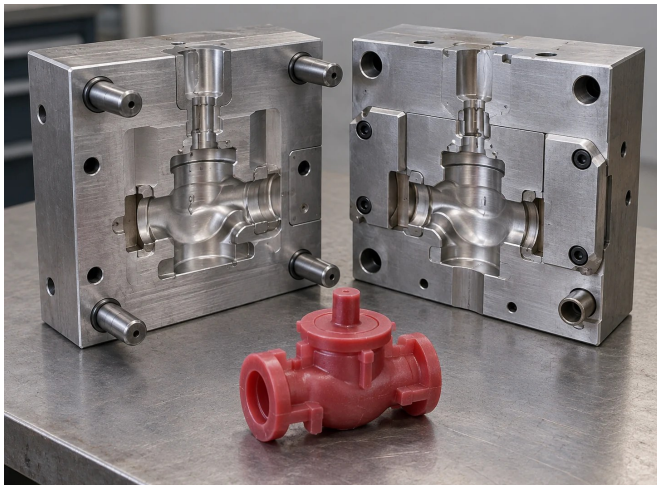

Representative tooling visual

Jash Enterprise

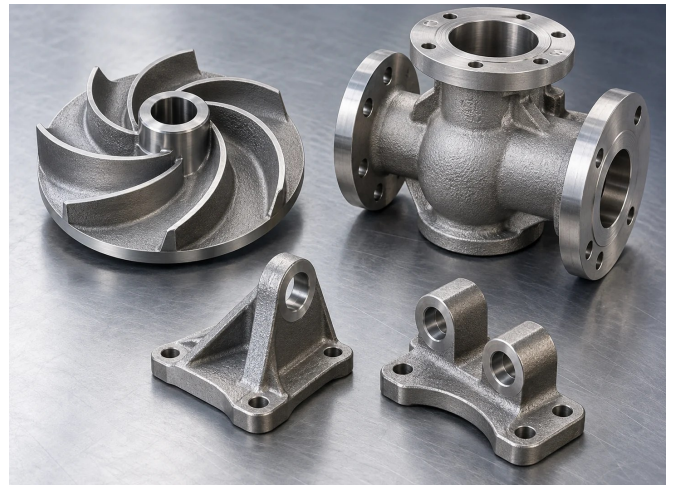

Drawing-led tooling enquiries from
Rajkot, Gujarat, India.

Tooling shaped around your component.

We start with the drawing, application and critical features to define a practical tooling requirement.

Representative tooling visual

Representative component visual

01 / Investment casting dies

Wax-pattern tooling reviewed around component geometry, cavity requirements and the intended application.

02 / Custom dies & moulds

Drawing-based enquiries for custom components, die features and mould requirements within an agreed manufacturing scope.

Define the requirement before the quotation.

Share dimensions, material, quantity and tooling purpose. Special materials, coatings, trials or testing requirements should be discussed before the job is confirmed.

A clear plan for every feature.

Representative machining visual

VMC machining & drawing review

Discuss machining for die parts, tooling components and industrial work against the agreed drawing. Material, machining features, tolerances and available capacity are reviewed for each enquiry.

Agreed drawing

05**Deliver**

Checks & packing

Quality starts with the agreed drawing revision, critical dimensions and inspection expectations.

Send the drawing. Start the conversation.

A useful brief helps connect design, machining and the quotation. Include the following information where available.

01 Drawing & revision

Dimensioned PDF drawing and CAD data where available.

02 Material & key features

Material specification, important dimensions, tolerances and finishes.

03 Quantity & application

Required quantity, component purpose and tooling requirements.

04 Delivery & inspection

Destination country, required date and the checks or records needed.
